ExpertPdf Html to Pdf Converter – Page Breaks

The ExpertPdf converter supports the following CSS styles to control the page breaks: *page-break-before:always*, *page-break-after:always* and *page-break-inside:avoid*. For example, with the page-break-after:always style applied to a HTML element (image, text, etc) you instruct the converter to insert a page break right after that element is rendered.

ExpertPdf Html To Pdf Converter – Headers and Footers

ExpertPdf provides full support for pdf document headers and footers. In order to show or hide the header or footer on the rendered document you have to set the ShowHeader and

ShowFooter properties of the PdfDocumentOptions property of the PdfConverter class. For example, to add both footer and header to the generated document you can use the following code:
